Technical report template document

Spring/Fall 20XX SoReMo Fellowship Project Final Technical Report

FirstName LastName, Illinois Institute of Technology*

Contents

Abstract

Write your abstract in plain English. Why did you do this project? What did it accomplish?

Background or introduction

Tell us more about the *context* of your project. Make sure to cite other work on which you're building. Line breaks do not matter unless there is a blank line between two lines of text - then it's a new paragraph,

like it just happened here.

Another section, such as technical details

What exactly did you do? Data, figures, etc.

---

*Contact the author.

Here is a subsection

you can focus on a specific aspect.

> Here is a quote.

Here is a sub-subsection with lists

And in it I want to include a list:

- item 1
- item 2
- but there often needs to be a blank line before a bulleted list, for Markdown to recognize it and format as a list!,

or a numbered, nested one:

1) i like
2) lists so much
   - but they have to be
   - easy to read.
     - indentation does the trick.

Future work

What might be a cool followup to this project? how would you imagine its impact?

Executive summary, or action proposal

Specific things you propose to be done, action items as a direct result of your project; *or* specific outcomes already observed. The project's impact on key stakeholders, whom you've clearly identified.

License

The template was created for publication in SoReMo.

Authors of the reports retain copyright of their work.

This document is created by Sonja Petrovic for SoReMo and is released under the same licence as the parent folder on Github.

Acknowledgements

Optional section. The Acknowledgements should contain text acknowledging non-author contributors. Acknowledgements should be brief, and should not include thanks to anonymous referees and editors or effusive comments. If applicable, additional grant numbers or supporting agencies may be acknowledged.

References

If you are able to knit your own HTML/PDF from Markdown, leave this section blank. The bibliography will be created from your file `mybiblio.bib`. If you are uncomfortable, add your references here in style as close to BibTex as possible, and the editors will help with the rest.
